ABOUT US

The M.C. Mehta Centre for Education and Research distinguishes itself by combining decades of environmental advocacy with vast legal and policy experience. The Centre, founded on the legacy of Shri M.C. Mehta, India's leading environmental lawyer and the recipient of global honours such as the Padma Shri, Ramon Magsaysay Award, and UNEP Global 500, is uniquely positioned to provide principled and practical training. The Centre is committed to teaching the next generation of environmental professionals in the same way that it has shaped groundbreaking environmental jurisprudence in India.

Our courses are designed for professionals who seek practical insights coupled with regulatory clarity and a science-driven approach to climate action. Our curriculum stands out for its interdisciplinary focus, data-driven methodologies, and real-world relevance for organisations navigating the fast-evolving landscape of Net Zero commitments, carbon markets, and GHG accounting standards.

PADMA SHRI MAHESH CHANDER MEHTA

Advocate Mahesh Chander Mehta is a pioneering public interest lawyer whose landmark environmental cases have redefined India's legal framework and strengthened environmental governance. Internationally acclaimed for his relentless pursuit of environmental justice, he has established key legal principles such as strict liability, the Polluter Pays Principle, and the Precautionary Principle.

Recipient of the Padma Shri, Ramon Magsaysay Award, and UNEP Global 500 Award, Advocate M.C. Mehta's landmark cases include Oleum Gas Leak (corporate liability), Ganga Pollution (industrial regulation), Taj Mahal Preservation (pollution control), Lead-Free Gasoline (air quality reform), Bichhri Groundwater Pollution (toxic cleanup), Tamil Nadu Tanneries (compensation for water pollution), and Prawn Farming case (coastal zone protection). His work continues to shape India's environmental policy and legal consciousness.

ABOUT THE PROGRAM

This certificate course equips participants with the skills to translate Net Zero commitments into actionable corporate strategies. It covers identifying emission hotspots, setting baselines, defining targets aligned with science-based targets-SBTi's, and drafting roadmaps that prioritise decarbonisation. The program also draws on global case studies to showcase best practices, helping companies integrate sustainability objectives effectively into their strategic planning.

Participants will also learn how to implement decarbonisation strategies across operations and supply chains, integrate Net Zero goals into governance and financial planning, and apply tools such as internal carbon pricing and circular economy models. The course emphasizes the monitoring of progress through KPIs, and reporting via BRSR Core, GRI, ISSB, CDP, and TCFD frameworks, enabling participants to draft a corporate Net Zero Action Plan with verification aligned with ISO 14064 and GHG Protocol turning sustainability commitments into measurable outcomes.

HIGHLIGHTS OF THE PROGRAM

COURSE CONTENT

Developing a Net Zero Strategy

- Translating Net Zero commitments into measurable corporate strategies
- Identifying emission hotspots and setting baselines
- Defining organisational targets aligned with SBTi
- Drafting Net Zero roadmaps and prioritising decarbonisation levers
- Analysing corporate case studies and global best practices

Operationalising the Net Zero Plan

- Implementing decarbonisation strategies across operations and supply chains
- Integrating Net Zero goals into governance and financial planning
- Driving stakeholder engagement and climate disclosures in alignment with global frameworks
- Monitoring progress through KPIs and performance dashboards
- Drafting a corporate Net Zero Action Plan with verification alignment (ISO 14064)

PEDAGOGY

Through a combination of expert-led lectures, practical case analyses, GHG accounting exercises, quizzes, and peer discussions, the program employs an interactive and experiential learning model.

To guarantee knowledge retention and professional application, focus is placed on collaborative learning, real-world relevance, and contextual application to national, regional and global contexts.

In order to facilitate continued learning after the program, participants will also receive exclusive in-depth course materials.

IS THIS COURSE FOR ME?

IF YOU ARE INTERESTED IN ANY OF THESE SECTORS...THEN YES!
